Contents

Availability

This is the UCC presentation slide template for LaTeX Beamer. This layout is still under development but will be mandatory for all public UCC presentations (eg meetings, conferences).

The *beamerthemeUCC* package for LaTeX will be available zipped for download at http://research.ucc.ie/latex and **must** be unzipped into your personal TeX folder at

```
Windows   C:/texmf
Mac       ~/Library/texmf
Linux     ~/texmf
```

You will also need the *uccbranding* package which provides the official colour definitions.

The template is also available from IT Services as a `.potx` file for use in Microsoft *Powerpoint* or OpenOffice (Libre Office) *Impress*.

How to use the UCC theme for your slides

```
\documentclass[svgnames,aspectratio=141]{beamer}
\usetheme{UCC}
\begin{document}

\title{Sketching the Fortifications}
\subtitle{Goethe's time in Malcesine}
\author{Johann Werther}
\department{Department of German}
\deptlogo{gerdeptlogo}
\maketitle

\begin{frame}
  \frametitle{...}
  ...your material...
\end{frame}

...

\end{document}
```
